

Combating Climate Change and Achieving Carbon-free Operations

Turn environmental risks into business opportunities across the supply chain

- 1 Define a long-term vision**

 - Understand "why" the client company considers it part of its business to address social issues
 - Assist in developing a vision based on analyses of social trends and the client's corporate philosophy
- 2 Develop a strategy for carbon-free operations**

 - Develop an actionable and deliverable strategy to achieve carbon-free operations
 - Define key goals and KPIs linked with the client's management strategy and plan
 - Assist in developing medium- and long-term objectives and strategies
- 3 Develop and implement a road map and an action plan**

 - Define objectives for the supply chain, assist in developing and implementing an action plan
 - Review and select suppliers of resources, raw materials, and energy
 - Assist in developing and designing products that help reduce environmental loads across the supply chain
- 4 Bolster the client's non-financial performance through information disclosure**

 - Assist in proactively disclosing information and communicating with external stakeholders to increase the client's enterprise value
 - Assist in having stakeholder dialogue, filling in questionnaires, and preparing required documents
