## Case Study on Creating a Decentralized, Autonomous Community

Minamisanriku, Miyagi Prefecture :  
Resolving community issues through resident-centric, “chain of circular approach”

Towns: Resident-centric approach to community development

Biogas plants: Converting garbage into usable resources

Forests: FSC® forest certification\*

Label certifying the product is from well-managed forests

Fields: Ecological farming

Ocean: ASC certification

Make the community disaster-resistant    Establish a decentralized, autonomous system    Create jobs    Create a branded community

\* FSC® forest certification: AMITA works with the Soil Association and SCS Global Services to provide forest certification services.
