

## Our Mission

Where is humankind from? Where is humankind going?  
Is humankind the victor of the game of survival of the fittest?  
Has humankind been specially chosen?

NO

No phenomenon is isolated.  
All phenomena are mutually dependent.

Mutually concerned, involved, infinitely lasting, returning, overlapping,  
continuing motion infinitely small and infinitely large,  
the continuing creation of limitless new relations,  
from the cosmically large to the microscopically small,  
the continuing creation of new relations.

The cosmos and life continue in limitless motion,  
Constant changes in the ecosystem are created,  
the exchange of complicated, non-sustainable information begins,  
life system cycle, continue to evolve.

Now, to bring to fulfill its inexhaustible greed, humankind is weakening,  
injuring, damaging the life system.

We declare this

to be recognized as a mutually dependent life form in the larger system of life,  
the realization of a sustainable society must be addressed with greatest urgency.

Our task as the formation of the circulation system,  
to create and to build new relations.
